

## How to Create a BitLocker Encrypted Flash Drive

(BitLocker is encryption is included with Windows 7 and newer)

1. Copy the discovery to the flash drive.

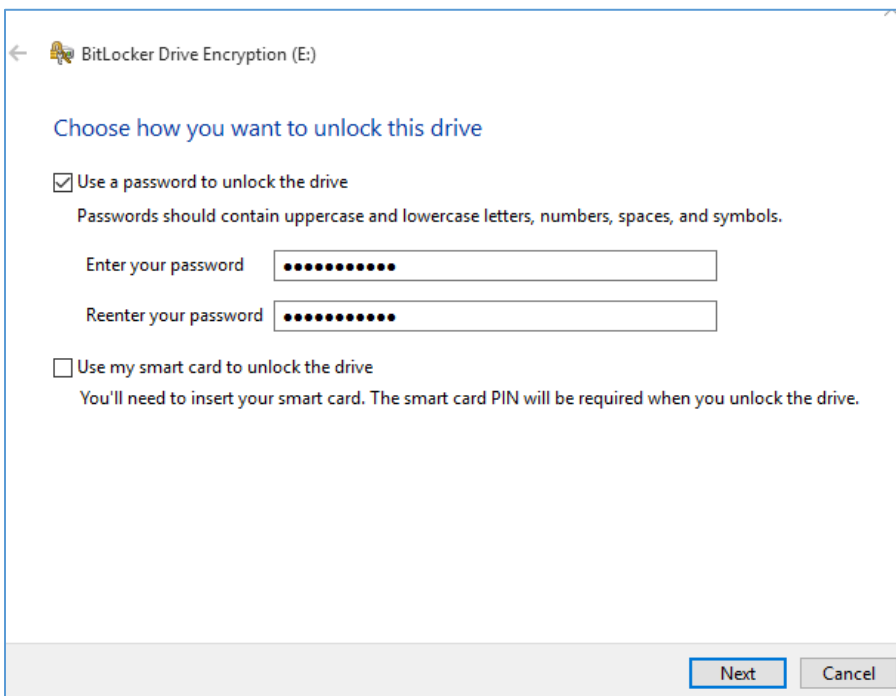

### WINDOWS 10

2. Open the flash drive with Windows Explorer.
3. There are several ways to enable BitLocker (use one of the following options)
  - Select the drive. From the Manage menu select Bitlocker.

- Right click drive letter for the Removable Disk, Turn on Bitlocker
- Open Control Panel -> System and Security -> Bitlocker Drive Encryption -> Select the removable drive letter (E:). Click Lock Drive.

2. Select “Turn on BitLocker” from the Menu

How do you want to back up your recovery key?  
Save to a file. Place in the client folder

NEXT

Choose how much of the drive to encrypt.  
“Encrypt used disk space only”

START Encrypting. Do not remove the drive.

This will take some time. 5GB of data takes approximately 20-25 minutes to encrypt.  
Wait until you see “Encryption is complete”.
